EDUCATION

University at Albany (2024 - 2026)

Master of Science, Computer Science

- Dean's Merit Award Recipient

Albany, NY

Cumulative GPA:3.4

Uka Tarsadia University (2019-2023)

Bachelor of Technology, Computer Engineer

Surat, India

Cumulative GPA: 3.24

EXPERIENCE

University at Albany [Grader (TA)-Part Time]

Jan 2026 – May 2026

- Graded quizzes, programming assignments, exam and project for undergraduate Computer Science course, ensuring accuracy and consistency.
- Assisted the professor in maintaining grade records and updating scores in shared systems.
- Provided constructive feedback to student to help and improve their understanding of course material.
- Collaborated with teaching staff to ensure timely evaluation and smooth course operations.

Griphhy LLP [Application Developer-Intern]

Dec 2022 - Jun 2023

- Developed an e-commerce web application for a shoe store using Flutter for the frontend and Dart for the backend.
- Implemented a real-time database to ensure consistent synchronization of product data user authentication details, cart states and purchase records throughout the app.
- Integrated secure online payment functionality by integrating Razorpay payment gateway, leveraging its API for payment processing order management and transaction verification.
- Developed a fully functional admin dashboard for managing products listing, orders, and inventory.
- Contributed to creating a user-friendly platform offering a wide range of shoes at competitive prices.

Toshal Infotech [Application Developer-Intern].

May 2022 - Jun 2022

- Learned Flutter framework and Dart Language for application development.
- Developed various small-scale projects utilizing Flutter to enhance my command on same.
- Acquired proficiency in Firebase Firestore and successfully integrated it into various projects.

PROJECTS

CoderV- Code learning platform for beginners

- Developed a full stack MERN application that enables visual learning of programming concepts through an interactive node based interface illustrating code execution flow and relationships.
- Built dynamic dashboards and user profiles to track progress including completed lessons, quiz performance, solved problems, and activity streaks.
- Designed Intutive UI with persistent sidebar navigation, tile based learning modules like lesson, quizzes, puzzles and also dark as well as light mode for improved user experience.
- Implemented RESTful API with Node.js and Express.js and integrated DB for efficient data management, along with authentication and protected routes for secure user access.

Online Exam Monitoring System

- Developed an online examination monitoring system using machine learning models like YOLOv5 to detect cheating using anomaly detection, device identification, person detection, ensuring fair and secure exams.
- Built a centralized platform for automated exam administration, performance tracking, and detailed reporting, streamlining processes for educators and students.

Kids Learning APP

- Developed an interactive learning application for children, enabling self-directed learning without the need for a tutor. Utilized HTML, CSS, PHP, and SQL for application development.
- Implemented a text-to-speech feature, allowing children to learn through audio and animations.

Reminder web APP(MERN)

- Developed a user-friendly reminder web application using React.js, Node.js, and MongoDB.
- Designed an intuitive interface that allows users to easily add, remove, and edit reminders while implementing timely notifications for their scheduled tasks. Integrated the Twilio API to enhance user authentication, ensuring secure and reliable access to the application.

SKILLS

- **Languages:** Python, Dart, JavaScript, PHP, HTML & CSS
- **Technologies:** Android, IoT, MERN, Firebase (Authentication, Firestore Database, Storage, Cloud Messaging, Hosting, Realtime Database), MongoDB, Git, GitHub, Gitlab, Selenium
- **Concepts:** Object-oriented Programming, mobile development, MVC, MVVM, Agile, Scrum, QA

CERTIFICATION

- Android Mobile Application Training
- Introduction to Python
- Introduction to Data Science
- SSIP Hackathon [10/2022]
- Machine Learning Bootcamp
