EDUCATION

University at Albany (2024 - 2026)

Master of Science, Computer Science

Albany, NY

Cumulative GPA:3.4

- Dean's Merit Award Recipient

Uka Tarsadia University (2019-2023)

Bachelor of Technology, Computer Engineer

Surat, India

Cumulative GPA: 3.24

EXPERIENCE

Senior Consultant - Heartland Community Network

July 2026 – Present

- Work with clients and internal teams to understand business needs and translate them into practical technical, analytical, and operational solutions.
- Collaborated with clients and cross-functional teams to understand business needs and translate them into practical technical, analytical, and operational solutions.
- Supported client projects across software development, AI and data science applications, digital marketing, and business process improvement.
- Assisted in designing, developing, testing, and maintaining software applications, data workflows, dashboards, automations, and digital solutions based on project requirements.
- Contributed to data analysis, reporting, market research, technical documentation, and implementation initiatives to support client growth, decision-making, and digital transformation.
- Worked across technical, marketing, data, and business teams to deliver scalable, efficient, and client-focused solutions across diverse industries.

Grader (TA) - State University of New York

Jan 2026 – May 2026

- Graded quizzes, programming assignments, exam and projects for 70 students of undergraduate Computer Science course, ensuring accuracy and consistency.
- Assisted the professor in maintaining grade records and updating scores in shared systems.
- Provided constructive feedback to student to help and improve their understanding of course material.
- Collaborated with teaching staff to ensure timely evaluation and smooth course operations.

Application Developer - Griphhy LLP

Dec 2022 - Jun 2023

- Developed and maintained a full-stack e-commerce web application for a shoe store using Flutter for the frontend and Dart for the backend, Firebase and SQL based data management following software engineering best practices.
- Designed Database structures and implemented a real-time database to ensure consistent synchronization of product data user authentication details, cart states and purchase records throughout the app.
- Integrated secure online payment functionality by integrating Razorpay payment gateway, leveraging its API for payment processing order management and transaction verification.
- Developed a fully functional admin dashboard for managing products listing, orders, and inventory.
- Contributed to creating a user-friendly platform offering a wide range of shoes at competitive prices.

Application Developer (Intern) - Toshali Infotech

May 2022 - Jun 2022

- Learned Flutter framework and Dart Language for application development.
- Developed various small-scale projects utilizing Flutter to enhance my command on same.
- Acquired proficiency in Firebase firestore and successfully integrated it into various projects.

PROJECTS

CoderV- Code learning platform for beginners

- Developed a full stack MERN application that enables visual learning of programming concepts through an interactive node-based interface illustrating code execution flow and relationships.

- Built dynamic dashboards and user profiles to track progress including completed lessons, quiz performance, solved problems, and activity streaks.
- Designed Intuitive UI with persistent sidebar navigation, tile based learning modules like lesson, quizzes, puzzles and also dark as well as light mode for improved user experience.
- Implemented RESTful API with Node.js and Express.js and integrated DB for efficient data management, along with authentication and protected routes for secure user access.

Online Exam Monitoring System

- Developed an online examination monitoring system using machine learning models like YOLOv5 to detect cheating using anomaly detection, device identification, person detection, ensuring fair and secure exams.
- Built a centralized platform for automated exam administration, performance tracking, and detailed reporting, streamlining processes for educators and students.

Soccer Game Analysis

- Built a soccer video analytics system using YOLOv8, ByteTrack, OpenCV, and Roboflow to detect and track players, referees, goalkeepers, and the ball.
- Implemented K-Means jersey-color clustering for team classification and player-to-team mapping, along with ball-possession detection.
- Applied Lucas–Kanade optical flow for camera-motion estimation and trajectory correction, with frame caching and batch processing to optimize inference.
- Achieved 95.83% mAP@0.5, 95.83% recall, and 97.87% F1-score on player/object detection.

Kids Learning APP

- Developed an interactive learning application for children, enabling self-directed learning without the need for a tutor. Utilized HTML, CSS, PHP, and SQL for application development.
- Implemented a text-to-speech feature, allowing children to learn through audio and animations.

Reminder web APP(MERN)

- Developed a user-friendly reminder web application using React.js, Node.js, and MongoDB.
- Designed an intuitive interface that allows users to easily add, remove, and edit reminders while implementing timely notifications for their scheduled tasks. Integrated the Twilio API to enhance user authentication, ensuring secure and reliable access to the application.

SKILLS

-
- **Languages:** Python, Dart, JavaScript, TypeScript, PHP, C#, HTML5 & CSS, SQL
 - **Technologies:** Visual Studio, Android, IoT, MERN, .NET, SQL server, Firebase (Authentication, Firestore Database, Storage, Cloud Messaging, Hosting, Realtime Database), Supabase, MongoDB, PostgreSQL, Docker, AWS/GCP (Cloud Function EC2/ Compute Engine, S3/Cloud Storage), Linux, Vercel, Render, Azure, GitHub Actions, REST & GraphQL APIs, Git, GitHub, Gitlab, Selenium
 - **AI/ML:** YOLOv5, anomaly detection, Object/ person detection pipeline, model, LangChain, OpenAI/ Anthropic API Integration, Prompt Engineering, RAG, Vector Databases (Pinecone/ Chroma), Scikit-learn, TensorFlow, Matplotlib, Numpy basics
 - **Concepts:** Object-oriented Programming, Mobile Development, Data Structures, MVC, MVVM, CI/CD, System Design Agile, Scrum, QA, API Security, Database Admin

CERTIFICATION

-
- Google Cloud Gen AI Beyond the Chatbot
 - Machine Learning Bootcamp
 - SSIP Hackathon [10/2022]
 - Introduction to Data Science
 - Introduction to Python
 - Android Mobile Application Training
